

ZENITECH®

## Why Red Raspberry Oil ?

**All Natural Cold processed  
Adequate for Sensitive Skin.**

**Use also as a massage oil.**

**Use to soothe skin after waxing & derma-abrasion.**

**Refreshes skin after exposure to sun.**

**Great antioxidant**

**Red Raspberry Oil** is unique because it contains high levels of Vitamin E in the form of alpha-tocopherol and gamma-tocopherol, which are the most active form of Vitamin E to protect your skin. As a result, Primal Nature's Red Raspberry Oil also protects from damaging UV-A and UV-B rays. And in addition to high concentrations of mixed tocopherols (Vitamin E), it contains carotenoids (Vitamin A).

**Red Raspberry Oil** is known especially for its prevention of gingivitis, rash, eczema, and other skin lesions. Its use as a cosmetic is based in part on its anti-inflammatory activities, which is superior when compared to those of other well-known oils such as virgin avocado oil and grapeseed oil.

Recent studies of red raspberry seeds by Canadian researchers (Oomah et al 2000) show that the most abundant fatty acids found in raspberry oil are linoleic, alpha-linolenic, and oleic acids. The composition of omega-3 and omega-6 fatty acids is one that research shows reduces the effects of oxidative stress in skin.

In addition to abundant fatty acids, red raspberry extract is a very rich source of alpha-tocopherol (E-306) and gamma-tocopherol (E-308). This tocopherol or Vitamin E rich composition has a well known function in skin repair and conditioning, which is related to antioxidant properties.
